Highly motivated and tech-enthusiastic **MERN Stack and Java Full Stack Developer** with a strong curiosity for learning and exploring new technologies. A disciplined and proactive individual with strong communication and leadership skills, always eager to take on new challenges, participate in activities, collaborate with teams, and continuously improve both technical and interpersonal skills.

Education:

Sage University, Indore – *Grad. 2027*
B. Tech in Computer Science & Engineering **CGPA: 8.03**

Kendriya Vidalaya Mungaoli, M.P. – *Grad. 2022*
PCM XII CBSE 72%

Programming Skills:

Languages: Java, JavaScript, HTML & CSS (Markup Language), MySQL
Technologies & Frameworks: Maven, Eclipse, React, Express, Node.js, MongoDB, Git / GitHub

Experience:

JAVA FullStack Intern – TheEntangle-X (*June 2026 – July 2026)*

- Developed **DermaRx**, a full-stack e-commerce web application for purchasing medical products, using **React.js** for the frontend and Java-based backend technologies.
- Built responsive and user-friendly **UI components in React.js** and integrated the frontend with backend APIs to enable seamless data flow and application functionality.
- Managed **frontend-backend connectivity, database integration, and CORS configuration**, ensuring secure and reliable communication between the application layers.

MERN Stack Intern – Zenvoyazer (*September 2025 – December 2025)*

- Contributed to multiple full-stack development projects using **React.js** and **Express.js**, delivering responsive and efficient web applications.
- Collaborated with cross-functional teams to implement scalable features and enhance overall UI/UX.
- Participated in code reviews, debugging sessions, and agile sprint planning, improving code quality and team productivity.

Projects:

DevNex Code Editor (Source)
React.js | Express.js | Node.js | MongoDB | CSS
Developed a GitHub-integrated AI-powered code editor as a team project to reduce repetitive developer tasks such as bug detection and code review. Contributed primarily to coding and development, implementing AI-based features for automated bug detection, code generation, refactoring, and pull request review. Used AI technologies to streamline the development workflow and improve developer productivity.

Simon Says Game (Source)
HTML | CSS | JavaScript
Developed an interactive Simon Says memory game using HTML, CSS, and JavaScript to challenge users' memory and concentration through progressively longer colour sequences. Implemented game logic, user input handling, scoring, and sequence generation using JavaScript, DOM manipulation, and event listeners. Designed a responsive and engaging interface with CSS, demonstrating strong fundamentals in front-end development and interactive web applications.

Certification

- Azure Fundamentals — Microsoft | 2025
- Full Stack Web Development — Apna College | 2025
- Database Management System — NPTEL | 2025

Extra-Curricular

Student Placement Coordinator - 2027 Batch

- Coordinating placement-related sessions, sharing recruitment updates and opportunities with students, and facilitating smooth communication between students and company delegates during campus placement drives.

Treasure of SUI-IEEE Student Branch (January 2025- December 2025)

- Organized hackathons & conducted sessions for 300+ college students on Web Development related topics.

Volunteer in Cloud Community days 2025

- Member of stage management committee of Cloud Community days organized by Google Developers Group, Indore
